Rutland™ Super Poly Plus White

Rutland™ EL9760 Super Poly Plus White ink is an easy-to-use white ink, designed for use on 100% polyester and polyester blend substrates. This premium ink performs well on the press as well as the finished garment. Rutland Poly Plus White ink combats dye migration by providing excellent bleed resistance, along with excellent opacity and coverage. This short bodied and fast flashing ink is surprisingly easy to print for a polyester ink, offering quick shear rates to achieve higher press speeds.

Printers can print directly onto polyester or polyester blends and can use it as an under base for difficult fabrics. Rutland Poly Plus White ink provides an excellent base for colors that are printed on top, thereby maintaining color integrity.

EL9760 Super Poly Plus White effectively replaces EL9746 Super Poly White as the newly improved white ink, offering improved bleed resistance and greater opacity.

KEY CHARACTERISTICS

- Provides high opacity and excellent coverage
- Combats dye migration
- Prints easily and quickly due to short body and fast shearing properties
- Offers bleed resistance

APPLICATIONS

- 100% polyester garments
- Polyester blend
