Biopolymers

Rutland™ Evolve™ Bio Plastisol™ Inks

Rutland™ Evolve™ Bio Plastisol™ Inks combine the latest innovations in bio-derived screen printing solutions with the excellent on-press performance of standard plastisol inks.

Created with over 50% bio-derived content*, Rutland Evolve Bio Plastisol Inks can reduce screen printers' reliance on fossil fuel-based inks while offering an intuitive plastisol ink printing experience. These inks provide an exceptional soft hand-feel and are print compatible with Rutland NPT C3 pigments.

Rutland Evolve Bio Plastisol Inks can be mixed to match thousands of Pantone®-simulated colors using IMS 3.0, Avient Specialty Inks' proprietary color formulation software. When printing with Rutland Evolve, formulas in IMS 3.0 will automatically calculate the amount of bio-derived content associated with each Pantone color.

*Bio-derived Content Percentages

- BP9520 Evolve Bio Plastisol Cotton White: 56%**
- BP0540 Evolve Bio Plastisol Cotton Mixing Base: 59%**

**Tested in accordance with ASTM D6866
