

UNION INK

PLUE9040 HOT SPLIT ADDITIVE

PLUE9040 HOT SPLIT ADDITIVE can be added to Union Ultrasoft inks to improve hot split properties for printed heat transfers.

Printing Tips Highlights Light and medium colored shirts. Ultrasoft inks will fully cure when the entire thickness of the ink deposit reaches 300° • F (149° • C). Hot-split and cold-peel transfers. Metallic inks are not recommended for transfer application. Ultrasoft ink will semi-cure or gel when it reaches 240°•-250°_ F (115°•-121° C) Add 5-10% by weight to Union Ultrasoft inks. Compliance Non-phthalate Internationally compliant

Precautions

services/compliance-support

The information above is given in good faith and does not release you from testing inks and fabrics to confirm suitability of substrate and application process to meet your customer standards and specifications.
