

MAGNAPRINT® ULTRA CLEAR GLITTER BASE

Ready-to-use glitter paste with ultra-high clarity finish

KEY FEATURES

- Ultra-clear glitter/particle binder (maximum loading 20% glitter)
- Provides excellent clarity
- Superior stretch and elasticity
- Excellent runnability and screen open time
- Excellent wash performance

APPLICATION

- Use 12-32T (30-86) mesh screens with rectangular profile squeegees
- Screen mesh selection should take glitter particle size into consideration
- If printing in conjunction with a multi-coloured design, print MagnaPrint Ultra Clear Glitter Base as the last colour to avoid pick up.
- After printing, cure for 2-2.5 minutes at 150°C (300°F)

MAGNAPRINT ADDITIVES (OPTIONAL)

Refer to relevant TDS for more information

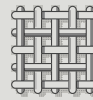

- **CROSSLINKER 100** (3% max)
Reduces the curing time and/or temperature of the ink

SPECIFICATIONS
