

Rose scented product in a universal polymer carrier suitable for inclusion in most master batch applications.

## PROPERTIES

- **Appearance** : Beige pellets
- **Melting temperature** : Approximately 84°C
- **Density** : 0.91g/cm<sup>3</sup>

## APPLICATION

The exact addition rates will vary depend on the final properties and application but normal addition of 1 – 5% of the overall weight would be recommended

## CHARACTERISTICS

1. Imparts rose fragrance to plastic articles
2. Easy to handle pellet form
3. Available in a range of fragrances
4. Manufactured to maximise the level of retained fragrance thus imparting as strong a fragrance as possible.

## DISCLAIMER

The information herein offered is based on the best of our knowledge at present. However, we are not able to guarantee these matters, as the result of application may vary according to conditions adopted. Preliminary tests are, therefore, recommended in all cases. Please refer to MSDS regarding handling of the products.
