PRODUCT INFORMATION BULLETIN

ASI Reducers

Avient Specialty Inks offers a range of reducers to lower the viscosity of plastisol inks. These reducers are used as additives to modify the flow and printing characteristics of plastisol inks.

HIGHLIGHTS

- ASI Viscosity Buster ASI Viscosity Buster LC ASI Curable Reducer
- Designed to reduce viscosity in plastisol inks

PRINTING TIPS

- Stir inks thoroughly when adding reducer
- ASI Curable Reducer is an efficient reducer and an addition of 5% by weight will lower the viscosity of most plastisol inks by 25%. Adding curable reducer at recommended amounts will not alter the cure temperature of the plastisol ink. Additions greater than 10% may reduce opacity, bleed and affect cure temperatures
- ASI Viscosity Buster is a concentrated reducer and will stabilize and improve the flow properties of plastisol finished inks. Viscosity buster is concentrated and very efficient in reducing viscosity at small amounts. Start at 0.5% by weight and increase by 0.5% until desired viscosity is reached. Do not use more the 3% by weight
- ASI Viscosity Buster LC is a technology and sustainable alternative to the ASI Viscosity Buster. ASI VISCOSITY BUSTER LC is a concentrated reducer and used to stabilize and improve the flow properties of plastisol finished inks. Viscosity Buster is concentrated and very efficient in reducing viscosity at small amounts. Start at 0.5% by weight and increase by 0.5% until desired viscosity is reached. Do not use more the 3% by weight
- ASI Viscosity Buster and ASI Viscosity Buster LC are best used with high viscous plastisol such as whites and blockers when reduction is needed. Please see specific PIBs
- When using these reducers within the recommended percentages, follow the cure temperature requirements as stated on the relevant plastisol ink PIB. Using these reducers will not lower the cure temperatures
- > With all reducers, any dramatic changes in viscosity may result in altered printing characteristics
- Store ASI Viscosity Buster LC at room temperature or above. Avoid storing this product in cold areas or on cold floors. Temperatures below 32°F (0°C) may cause the product to separate

COMPLIANCE

- Non-phthalate
- For individual compliance certifications and conformity statements, please visit www.avientspecialtyinks.com/services/compliance-support

PRECAUTIONS

The information above is given in good faith and does not release you from testing inks and fabrics to confirm suitability of substrate and application process to meet your customer standards and specifications

AVIENT SPECIALTY INKS

V1.15 (Modified: 08/25/2025)

RECOMMENDED PARAMETERS

Fabric Types

Mesh

Count: see relevant PIB Tension: see relevant PIB

Squeegee

Durometer: see relevant PIB Profile: see relevant PIB Stroke: see relevant PIB Angle: see relevant PIB

Stencil

see relevant PIB Off Contact: see relevant PIB Emulsion Over Mesh: see relevant PIB

Flash & Cure

Flash: see relevant PIB Cure: see relevant PIB

Pigment Loading

N/A

Additives

N/A

Storage

65-90°F (18-32°C) Avoid direct sunlight Use within one year of receipt

Clean Up

Dispose unused ink responsibly
